

PAVAN KUMAR MORLA

.Net Developer

Email: pavankmorla00@gmail.com | Phone: +1 475-241-5947 |

[LinkedIn](#)

OBJECTIVE:

- .Net Developer with **5 years** of diverse experience in all phases of Software Development Life Cycle process (SDLC) involving Analysis, Design, Development, Deployment, Testing and Implementation of Client/Server applications using Microsoft .NET.
- Fundamental knowledge of application development using Java technologies like Node.js, REST and Frameworks such as JDBC, Spring, XML etc.
- Experience in Agile Software development process using SCRUM methodology and Waterfall model.
- Hands on technology experience of designing and developing software applications with Microsoft .NET Framework using C#, VB.Net, ASP.NET and ADO.Net.
- Expertise in developing Client/Server Applications on Three Tier Architecture, N-Tier Architecture, SOA (Service-oriented Architecture), MVC (Model View Controller), Entity Framework.
- Hands-on Front-end skills like **HTML5, CSS3, XML, JQuery, AJAX, Json**, JavaScript, bootstrap, Angular JS for Windows 8 modern style.
- Experienced in using Technologies like SOAP, XPATH, XSL and XSLT.
- Extensive experience in creating rich content Web-Forms, Win-Forms (Windows Forms), Web User Controls, Custom Control, Server Controls, Windows Service and Web Service.
- Expert knowledge of versioning tools like **TFS** (Team Foundation Server), VSS (Visual Source Safe).
- Hands on experience with SQL Server 2005, 2008, 2012, 2014, 2016 & 2019
- Extensively worked on writing Stored Procedures, Triggers, Functions, Views and Database Design.
- Experience in technical design documentations using UML modeling, OO analysis, design, and design patterns to standardize the application architecture
- Knowledge of Object-Oriented Design Methodology (OOPS) using MS Visio and business objects reports using Crystal Reports and SQL Server Reporting Services.
- Experience in software unit testing and efficiency at fact-finding, root cause analysis and bug-fixing.

SKILLS:

Programming Languages	C#, JavaScript, TypeScript, Python, SQL, LINQ
Frontend Technologies	Angular14, React.js, HTML5, CSS3, Bootstrap, Telerik UI
Backend & Frameworks	ASP.NET Core, .NET Framework, Entity Framework, Web API, WCF, GraphQL, gRPC
Database Management	SQL Server (2012+), MySQL, PostgreSQL, MongoDB, Cosmos DB
Cloud & DevOps	Azure DevOps, Azure Functions, Azure Logic Apps, Docker, Kubernetes, Jenkins, Git, GitHub, Helm
Testing & Monitoring	Postman, Swagger, NUnit, Selenium, JMeter, ELK Stack, Splunk, New Relic, Prometheus
Other Tools	Visual Studio, JIRA, MS Office Suite, PowerShell

CERTIFICATIONS:

- **Microsoft Certified: Azure Fundamentals (AZ – 900)**
- **Microsoft Certified: Azure Developer Associate (AZ-204)**
- **Certificate in AWS Developer Associate (In progress)**

EXPERIENCE:

Client: Optum, Eden Prairie, MN

Feb 2023 – Current

Role: .NET Developer

Responsibilities:

- Collaborated in **Agile (SCRUM) teams**, leveraging TDD methodologies to enhance development quality and productivity.
- Designed and implemented **RESTful APIs** for microservices architecture, reducing service latency by 25%.
- Gathered requirements in collaboration with clients and developed scalable, responsive web applications using **ASP.NET MVC**, and **.Net Framework 4.7**.
- Developed dynamic and responsive **Html, CSS, Typescript, Angular 14+ single-page applications (SPAs)** using **NgRx, RxJS**, and **PrimeNG**, ensuring seamless user interaction and state management.
- Utilized **Azure Functions, Logic Apps, and Azure Storage** to design serverless workflows, optimizing task automation and resource utilization.
- Utilized **X unit** and **N unit** and use the selenium for automation testing **swagger** and **Postman** for the API.
- Employed **Azure API Management** for secure API gateway setup, authentication, and throttling controls.
- Integrated **Karma with Jasmine** for writing and executing test cases, automating the testing process.
- Built and maintained **CI/CD** pipelines in **Azure DevOps** for automated builds, tests, and deployments.
- Leveraged Docker and Kubernetes for containerization and scaling across cloud platforms.
- Secured **APIs with OAuth 2.0, JWT, and CORS** for robust authentication and data access controls.
- Optimized **SQL Server databases**, authored complex stored procedures, and ensured data integrity using ORM tools like Entity Framework and Dapper.
- Developed and integrated **WCF services** for backend data workflows, utilizing **LINQ** and **JSON** for robust data processing.
- Enhanced monitoring using **Splunk and Prometheus** for performance tracking and issue resolution
- Collaborated with cross-functional teams to improve code quality and development workflows, utilizing tools like **Git, GitHub** and **JIRA**.
- Used **Terraform** to provision and manage **Azure resources**, enabling consistent and scalable infrastructure deployments.

Achievements:

Achieved 30% improvement in application performance through asynchronous processing with **Kafka**.

Enhanced reporting accuracy and reduced error rates by 25% through optimized **SSRS and SSIS** processes.

Streamlined cloud-based workflows, resulting in a 40% decrease in data latency across applications.

Client: Access Healthcare - India

Mar 2019 – Apr 2022

Role: .NET Developer

Responsibilities:

- Developed web forms and APIs using **ASP.NET Core, C#.NET, and RESTful** services, following SOLID principles and leveraging modern object-oriented design patterns.
- Designed and developed business logic and data access layers using **ASP.NET Core and C#.NET, with JSON and XML** for efficient data handling and transport.
- Actively participated in database design and development, optimizing performance with Entity Framework Core and working with **SQL Server and NoSQL databases (MongoDB)**.
- Worked extensively with **Entity Framework Core and Dapper** for data access, improving database performance and handling complex queries efficiently.
- Created and optimized stored procedures, views, and complex **SQL queries in SQL Server**, applying advanced indexing and query tuning techniques.
- Developed responsive and dynamic front-end user interfaces using **React, ASP.NET Core MVC, HTML5, CSS3, JavaScript, and TypeScript**, ensuring optimal performance and cross-browser compatibility.
- Implemented client-side scripting using modern **JavaScript frameworks like React**, to deliver seamless, interactive user experiences.
- Utilized **Razor Pages and Blazor in ASP.NET Core** for a unified and component-based UI experience, delivering highly scalable and modular web applications.
- Utilized **Data Tables, Kendo UI, and Telerik** controls in **ASP.NET Core** for efficient data manipulation and dynamic rendering of complex data sets.

- Developed secure, scalable user interfaces, leveraging best practices in **OAuth 2.0, OpenID Connect, and JWT** authentication for securing **REST APIs** and front-end interactions.
- Improved user experience and server-side performance by integrating **AJAX**, reducing response times, and enhancing overall application performance

Achievements:

Reduced data processing time by 35% through optimized **SQL** queries and **Entity Framework Core** implementation.
Improved application performance by implementing microservices, achieving a 20% boost in responsiveness.
Enhanced secure data handling and client satisfaction by implementing **OAuth2** for **RESTful API** integrations.

EDUCATION:

- Masters in Computer Information Systems from New England College, Henniker, New Hampshire - USA.
- Bachelors in Civil Engineering from Prasad, V Potluri Siddhartha Institute of Technology – India.
